26 and 27 year down 45 percent inhibition 200 people College Recruiting Kyuden

2012.12.27 02:06

26, I found that Kyushu Electric has fallen into deficit in the long-term stoppage of nuclear power plant is closing and 200 people, respectively, 26 and 27 new graduates of the year Heisei 45% reduction compared to the year 24 363 people. Documentation was submitted to the Committee on the Ministry of Economy, Trade and Industry which was held on the same day for review of electricity tariff hike Kyuden.

In April 2013, Kyushu Electric Power Economy, Trade and Industry Minister to apply to the November price increase of 8.51% on average electricity prices for household use. Have also expressed an average price increase of 14.22 percent for the enterprise. And lowering 21% of annual income employees, on average three years in fiscal 25-27 to reduce ¥ 16.8 billion from ¥ 133.5 billion year conventional total labor costs, Kyushu Electric Power is incorporating the rationalization measures to ¥ 116.7 billion upon application .

Suppression is also employed revealed this day, one of the measures to reduce labor costs. Kyuden FY 21-24 has been adopted by new graduates every year around 370 people. Adoption year number 25 (nominee) is reduced to 256 people. Both years 26 and 27 and further reduced by 200 people. For and about the same number of retirees, total number of employees does not change before and after 10 003 thousand people around the technical jobs. Kyushu Electric Power has adopted the high school graduates in scale every year just 100 people, for the local high school in Kyushu prospective rate is sluggish but it is also an important place of employment. A voice asked from Commercial High School and Technical High School, in particular to ensure the recruitment of high school students have been asked to Kyuden.
